Cliché Consequences

kiss and make up	reconcile
a far cry	a long distance
bump in the road	setback
	tell application "Safari" activate open location "https://davidblue.wtf/styleguide" end tell
Trump	Tump
Really struck me	tell application "Safari" activate open location "https://davidblue.wtf/styleguide" end tell
When it's all said and done	tell application "Safari" activate open location "https://davidblue.wtf/styleguide" end tell
docsdrop	https://raindrop.io/davidblue/documentation-14989755
at this point in time	presently
plain as day	obvious
beg to differ	disagree
last but not least	finally
neither here nor there	not important
in a nutshell	in short
needless to say	of course
on cloud nine	elated
it's only a matter of time	eventually
throw in the towel	give up
steer away from	avoid
tip of the iceberg	small, more noticeable part of the problem
time and time again	repeatedly
keep an eye on	monitor
when push comes to shove	when needed
in this day and age	at the present time

phall # The Unparalleled Adventure of One Hans Phall

by Edgar Allan Poe

THERE IS, strictly speaking, but little similarity between this sketchy trifle and the very celebrated and very beautiful "Moon-s
some of the New York papers copied "Hans Phaall," and collated it with the Hoax- with the view of detecting the writer of the

By late accounts from Rotterdam, that city seems to be in a high state of philosophical excitement. Indeed, phenomena have
unusually so for the season- there was hardly a breath of air stirring; and the multitude were in no bad humor at being now
corners of ten thousand mouths, and a shout, which could be compared to nothing but the roaring of Niagara, resounded lo

The origin of this hubbub soon became sufficiently evident. From behind the huge bulk of one of those sharply-defined mas
could imagine; no one- not even the burgomaster Mynheer Superbus Von Underduk- had the slightest clew by which to unra

In the meantime, however, lower and still lower toward the goodly city, came the object of so much curiosity, and the cause
question, and composed, I have it on the best authority, of the precise material which no one had ever before known to be u
instruments, resembling sheep-bells, which kept up a continual tinkling to the tune of Betty Martin. But still worse. Suspende
an exclamation of joyful surprise, and declared it to be the identical hat of her good man himself. Now this was a circumstan
Rotterdam, and some people went so far as to imagine that in this spot a foul murder had been committed, and that the suf

The balloon (for such no doubt it was) had now descended to within a hundred feet of the earth, allowing the crowd below a
to his entire figure a rotundity highly absurd. His feet, of course, could not be seen at all, although a horny substance of susp
discovered upon any portion of his head. This odd little gentleman was dressed in a loose surtout of sky-blue satin, with tigh

Having descended, as I said before, to about one hundred feet from the surface of the earth, the little old gentleman was su
evidently astonished at its weight. He at length opened it, and drawing there from a huge letter sealed with red sealing-wax
without taking the trouble to empty their contents, tumbled, every one of them, most unfortunately upon the back of the bu
whole time with all his might, and to which he intends holding fast until the day of his death.

In the meantime the balloon arose like a lark, and, soaring far away above the city, at length drifted quietly behind a cloud si
movements, to bestow a thought upon the important subject of securing the packet in question, which was seen, upon insp

> To their Excellencies Von Underduk and Rub-a-dub, President and Vice-President of the States' College of Astronomers, in

> Your Excellencies may perhaps be able to remember an humble artizan, by name Hans Phaall, and by occupation a mende
called Sauerkraut, in which I resided at the time of my disappearance. My ancestors have also resided therein time out of mi
began to feel the effects of liberty and long speeches, and radicalism, and all that sort of thing. People who were formerly, th
in all Rotterdam that ever stood in need of a stitch or required the assistance of a hammer. This was a state of things not to
fellows in particular who worried me beyond endurance, keeping watch continually about my door, and threatening me with
opportunity of vengeance should be afforded me.

> One day, having given my creditors the slip, and feeling more than usually dejected, I continued for a long time to wander
name. I had some little tincture of information on matters of this nature, and soon became more and more absorbed in the
imagination in a powerful and extraordinary manner. The longer I meditated upon these the more intense grew the interest
those crude ideas which, arising in ill-regulated minds, have all the appearance, may not often in effect possess all the force,
Nature herself seemed to afford me corroboration of these ideas. In the contemplation of the heavenly bodies it struck me f
in the course of an eventful five years, during which I have dropped the prejudices of my former humble situation in life, and

> It was late when I reached home, and I went immediately to bed. My mind, however, was too much occupied to sleep, and
for the execution of my plan. In the intervals of this period, I made every endeavor to conciliate the three creditors who had

> Matters being thus arranged, I contrived, by the aid of my wife and with the greatest secrecy and caution, to dispose of wh
construction and equipment of a balloon of extraordinary dimensions. This I directed my wife to make up as soon as possibl
iron-bound casks, to contain about fifty gallons each, and one of a larger size; six tinned ware tubes, three inches in diamete
conditionally communicated to myself. The same individual submitted to me, without being at all aware of my intentions, a r
material I have spoken of, and I do not wish to deprive him of the honor of a very singular invention.

> On the spot which I intended each of the smaller casks to occupy respectively during the inflation of the balloon, I privately
into one of the canisters the end of about four feet of slow match, I covered up the hole, and placed the cask over it, leaving

> Besides the articles above enumerated, I conveyed to the depot, and there secreted, one of M. Grimm's improvements up
implements, and, if I managed rightly, with one hundred and seventy-five pounds of ballast into the bargain. It had received

> Everything being now ready, I exacted from my wife an oath of secrecy in relation to all my actions from the day of my first
glad to get rid of me. It was a dark night when I bade her good-bye, and taking with me, as aides-de-camp, the three creditor

> It was the first of April. The night, as I said before, was dark; there was not a star to be seen; and a drizzling rain, falling at i
with all this apparatus, and expressed much dissatisfaction at the terrible labor I made them undergo. They could not perce
of payment of all scores in full, as soon as I could bring the present business to a termination. To these speeches they gave,

> In about four hours and a half I found the balloon sufficiently inflated. I attached the car, therefore, and put all my implem
slow match, whose end, as I said before, protruded a very little beyond the lower rim of one of the smaller casks. This mano

> Scarcely, however, had I attained the height of fifty yards, when, roaring and rumbling up after me in the most horrible anc
body rushing to my temples, and immediately thereupon, a concussion, which I shall never forget, burst abruptly through th
a drunken man, hurled me with great force over the rim of the car, and left me dangling, at a terrific height, with my head dc
starting from their sockets- a horrible nausea overwhelmed me- and at length I fainted away.

> How long I remained in this state it is impossible to say. It must, however, have been no inconsiderable time, for when I pa
my hands, one after the other, and wondered what occurrence could have given rise to the swelling of the veins, and the ho
chagrined. It now occurred to me that I suffered great uneasiness in the joint of my left ankle, and a dim consciousness of m
compressing my lips, putting my forefinger to the side of my nose, and making use of other gesticulations and grimaces com
right angles to the body of the buckle, and was glad to find them remain firm in that position. Holding the instrument thus o
as I had anticipated, in the circular rim of the wicker-work.

> My body was now inclined towards the side of the car, at an angle of about forty-five degrees; but it must not be understoc
instead of turned outwardly from it, as it actually was; or if, in the second place, the cord by which I was suspended had char
perhaps, a quarter of an hour in that extraordinary manner, without making the slightest farther exertion whatsoever, and i
danger, merely served to deprive me of the self-possession and courage to encounter it. But this weakness was, luckily for m

> It was not until some time afterward that I recovered myself sufficiently to attend to the ordinary cares of the balloon. I the

pigeons with an air of nonchalance. These latter being tied by the leg, to prevent their escape, were busily employed in picki

> At twenty minutes past six o'clock, the barometer showed an elevation of 26,400 feet, or five miles to a fraction. The prosp
surface. "As five miles, then, to eight thousand," would express the proportion of the earth's area seen by me. In other word
suffer no inconvenience whatsoever.

> At twenty minutes before seven, the balloon entered a long series of dense cloud, which put me to great trouble, by dama
ascent. In a few seconds after my leaving the cloud, a flash of vivid lightning shot from one end of it to the other, and causec
and stalk about in the strange vaulted halls, and ruddy gulfs, and red ghastly chasms of the hideous and unfathomable fire.

> I was now rising rapidly, and by seven o'clock the barometer indicated an altitude of no less than nine miles and a half. I be
distorted to my vision. These symptoms were more than I had expected, and occasioned me some alarm. At this juncture, ve
breath only at long intervals, and in a gasping manner- bleeding all the while copiously at the nose and ears, and even slight

contributed also to render me nearly incapable of making any exertion for the preservation of my life. I had, indeed, little po
to collect my faculties. In this I so far succeeded as to determine upon the experiment of losing blood. Having no lancet, how
my arm as well as I could, I lay still for about a quarter of an hour. At the end of this time I arose, and found myself freer fror
three little kittens. This was an addition to the number of passengers on my part altogether unexpected; but I was pleased a
must consider my theory in fault, but a failure to do so I should look upon as a strong confirmation of my idea.

> By eight o'clock I had actually attained an elevation of seventeen miles above the surface of the earth. Thus it seemed to m
inhalation was attended with a troublesome spasmodic action of the chest. I now unpacked the condensing apparatus, and

> The view of the earth, at this period of my ascension, was beautiful indeed. To the westward, the northward, and the south
discovered, and the proudest cities of mankind had utterly faded away from the face of the earth. From the rock of Gibraltar

> The pigeons about this time seeming to undergo much suffering, I determined upon giving them their liberty. I first untied
uttering at the same time very shrill and piercing cries. He at length succeeded in regaining his former station on the rim, bu
reached home in safety. Puss, who seemed in a great measure recovered from her illness, now made a hearty meal of the d

> At a quarter-past eight, being no longer able to draw breath without the most intolerable pain, I proceeded forthwith to ad
purposes of respiration. With this object in view I had prepared a very strong perfectly air-tight, but flexible gum-elastic bag.
net-work- in other words, between the net-work and the hoop. But if the net-work were separated from the hoop to admit tl
to a series of large buttons, affixed to the cloth itself, about three feet below the mouth of the bag, the intervals between the
with all its contents, would be held up merely by the strength of the buttons. This, at first sight, would seem an inadequate c
occasion. This was done, of course, to keep the bag distended at the top, and to preserve the lower part of the net-work in it

> In the sides of the covering thus adjusted round the car, had been inserted three circular panes of thick but clear glass, thr
the cloth, I could expect to see no objects situated directly in my zenith. This, of course, was a matter of little consequence; f

> About a foot below one of the side windows was a circular opening, eight inches in diameter, and fitted with a brass rim ac
times, at length filled the chamber with atmosphere proper for all the purposes of respiration. But in so confined a space it v
until one or two strokes from the pump of the condenser had supplied the place of the atmosphere ejected. For the sake of

> By the time I had fully completed these arrangements and filled the chamber as explained, it wanted only ten minutes of n

> Upon the resistance or, more properly, upon the support of an atmosphere, existing in the state of density imagined, I hac no indication whatever of a decreasing rarity in the air.

> April 19th. This morning, to my great joy, about nine o'clock, the surface of the moon being frightfully near, and my apprel car. As might have been expected, spasms and violent headache were the immediate consequences of an experiment so pr an atmosphere dense in proportion to the mass of the satellite, still I had been wrong in supposing this density, even at the which I have formerly alluded. At all events I was now close upon the planet, and coming down with the most terrible impetu and thus, clinging with both hands to the net-work, I had barely time to observe that the whole country, as far as the eye cou gazing upward at the earth so lately left, and left perhaps for ever, beheld it like a huge, dull, copper shield, about two degre

> Thus, may it please your Excellencies, after a series of great anxieties, unheard of dangers, and unparalleled escapes, I hac doubly so by its intimate connection, in capacity of satellite, with the world inhabited by man, I may have intelligence for the constant transfer of moisture, by distillation like that in vacuo, from the point beneath the sun to the point the farthest from particular individual in the moon with some particular individual on the earth- a connection analogous with, and depending about the earth, have never yet been turned, and, by God's mercy, never shall be turned, to the scrutiny of the telescopes of guilty in the death of the creditors upon my departure from Rotterdam. This, then, is the object of the present paper. Its bea

> I have the honor to be, etc., your Excellencies' very humble servant,

> HANS PHAALL.

Upon finishing the perusal of this very extraordinary document, Professor Rub-a-dub, it is said, dropped his pipe upon the g Underduk, as he took the arm of his brother in science, and without saying a word, began to make the best of his way home assented, and the matter was therefore at an end. Not so, however, rumors and speculations. The letter, having been publis

Imprimus. That certain wags in Rotterdam have certain especial antipathies to certain burgomasters and astronomers.

Secondly. That an odd little dwarf and bottle conjurer, both of whose ears, for some misdemeanor, have been cut off close t

Thirdly. That the newspapers which were stuck all over the little balloon were newspapers of Holland, and therefore could n

He was mistaken- undoubtedly- mistaken.

Fourthly, That Hans Phaall himself, the druken villain, and the three very idle gentlemen styled his creditors, were all seen, n

Don't believe it- don't believe a word of it.

Lastly. That it is an opinion very generally received, or which ought to be generally received, that the College of Astronomers

capscolossus
Not like the brazen giant of Greek fame,
With conquering limbs astride from land to land;
Here at our sea-washed, sunset gates shall stand
A mighty woman with a torch, whose flame
Is the imprisoned lightning, and her name
Mother of Exiles. From her beacon-hand
Glows world-wide welcome; her mild eyes command
The air-bridged harbor that twin cities frame.
"Keep, ancient lands, your storied pomp!" cries she
With silent lips. "Give me your tired, your poor,
Your huddled masses yearning to breathe free,
The wretched refuse of your teeming shore.
Send these, the homeless, tempest-tost to me,
I lift my lamp beside the golden door!"

italcolossus *Not like the brazen giant of Greek fame,*
With conquering limbs astride from land to land;
Here at our sea-washed, sunset gates shall stand
A mighty woman with a torch, whose flame
Is the imprisoned lightning, and her name
Mother of Exiles. From her beacon-hand
Glows world-wide welcome; her mild eyes command
The air-bridged harbor that twin cities frame.
"Keep, ancient lands, your storied pomp!" cries she
With silent lips. "Give me your tired, your poor,
Your huddled masses yearning to breathe free,
The wretched refuse of your teeming shore.
Send these, the homeless, tempest-tost to me,

I lift my lamp beside the golden door!"

gothcolossus Not lift my lamp beside the golden door!"
Lift my lamp beside the golden door!"
Send these, the homeless, tempest-tost to me,
Here at our sea-washed, sunset gates shall stand
A mighty woman with a torch, whose flame
Is the imprisoned lightning, and her name
Mother of exiles. From her beacon-hand
Glows world-wide welcome; her mild eyes command
The air-bridged harbor that twin cities frame.
"Keep ancient lands, your storied pomp!" cries she
With silent lips. "Give me your tired, your poor,
Your huddled masses yearning to breathe free,
The wretched refuse of your teeming shore.
Send these, the homeless, tempest-tost to me,
I lift my lamp beside the golden door!"

Cliché Corrections

at the end of the day	ultimately
plain as day	obvious
at this point in time	presently
bump in the road	setback
a far cry	a long distance
kiss and make up	reconcile
in this day and age	at the present time
when push comes to shove	when needed
keep an eye on	monitor
time and time again	repeatedly
tip of the iceberg	small, more noticeable part of the problem
steer away from	avoid
throw in the towel	give up
it's only a matter of time	eventually
on cloud nine	elated
needless to say	of course
in a nutshell	in short
neither here nor there	not important
last but not least	finally
beg to differ	disagree
